

Thank you...

...for choosing Dartington.

Founded in rural North Devon we have been designing and hand-crafting crystal and glass to the highest standards since 1967. Dartington is hand-made using traditional craft techniques. This means that no two items will ever be exactly alike, and tiny bubbles and small marks are sometimes a feature of their unique creation.

Your Peace of Mind Guarantee

We want you to be delighted with your choice of Dartington. If for any reason you are not satisfied we will be happy to replace your item if it proves faulty.

Care and use

Every piece of Dartington is created to be used and enjoyed. To ensure your collection keeps its good looks we recommend the following:

Always...

- Wash before using for the first time. If hand washing use warm soapy water and a soft cloth.
- Dry with a soft cloth holding glasses by the bowl.
- Change liquid content and wash vases and decanters regularly to prevent staining.
- If staining does occur, remove with vinegar on a soft cloth, or soak in a solution of vinegar and water (50/50). Decanter cleaning pellets or a mild abrasive such as rice can be used inside containers.
- Stand or store stemware right side up to avoid damage to the rims.
- Use wooden spoons with serving bowls to avoid chipping.

- Dartington can be used with care in the dishwasher. Use a low temperature or glass washing cycle. Dartington recommends Finish detergent for dishwasher use.

Never...

- Expose crystal or glass to rapid temperature changes, i.e. very hot oven or cold water.
- Use crystal or glass products in microwave, conventional oven or freezer.
- Allow a naked flame to come into contact with the crystal or glass or leave a burning candle unattended.
- Re-light night lights that may have burned to below half their container depth.
- Never stack one glass inside another.
